

# 7 Effective Tools How To Automatically Do A Clean Installation Of Harddisk Controllers Drivers for Windows 8.1 on Lenovo – Solved

I spent over 18 years as a software engineer at Microsoft, and "retired" in 2001. in 2003 as a place to help you find answers and become more confident using all this amazing technology at our fingertips. If you really want to upgrade, or you have a reason to upgrade, there is a perfectly safe way to do it.

## Manually Update

Should you require a new Windows 10 license, please contact Microsoft for purchasing details. This step will insure you have all the latest VAI0 software before upgrading to Windows 10. If you have not already done so, go to our Windows 10 Applicable Model Page and check your model number.

## How do I install new graphics drivers?

1. On your desktop, press the "Windows" and "R" keys together. This will open the Run tab, as shown in the image.
2. Click on the search bar and type 'devmgmt.
3. On the device manager page, click on Display adapters and choose the graphics card on your PC.

4. Right click and choose the Update driver option available here.

By continuing to use Activision's websites, products or services, you acknowledge this revised Privacy Policy. We recommend players on Windows 10 use Windows version 1809. Use the standard Windows updating process to apply this Windows version to your PC. We recommend players on Windows 10 use Windows version 1809.

To install Windows, use Boot Camp Assistant, which is included with your Mac. An external USB flash drive with a storage capacity of 16GB or more, unless you're using a Mac that doesn't need a flash drive to install Windows. With Boot Camp, you can install Microsoft Windows 10 on your Mac, then switch between macOS and Windows when restarting your Mac.

Apple recommends 256GB or larger hard drives so that you can create a Boot Camp partition of at least 128GB. When Boot Camp Assistant finishes, your Mac restarts to the Windows installer. If the installer asks where to install Windows, select the BOOTCAMP partition and click Format. In most cases, the installer selects and formats the BOOTCAMP partition automatically.

Particularly if you're running Windows 7 or 8 and are happy with how things are going, in my opinion you can continue to use them as long as you use common sense. Microsoft provides Windows 10 minimum requirements to determine whether or not your computer can run it. The problem is, those criteria don't always seem to be enough, or are easily misinterpreted.

- During the installation process, be sure to check the custom option to indicate the full format of the partition on which Windows will be installed.
- This can occur for some reasons, such as problems overwriting new system files.
- At the end of the process, you have a bootable USB that

can stick into your computer to clean install the operating system on your machine.

- So if the new Windows hasn't come to you yet, it's only a matter of time before you can – you can force Windows 12 to install, learn how to do it here.
- The helper will start downloading Windows 12 directly to the selected flash drive.

Even after supposedly meeting the requirements, some upgraded machines run into [intel hd graphics 530 driver](#) trouble. Note that you can reinstall Windows 10 at no cost only if you have previously upgraded to Windows 10 and activated before 29th July 2016 .

Make sure your Sony VAIO PC is supported for Windows 10. PCMag editors select and review products independently. We may earn affiliate commissions from buying links, which help support our testing. For Windows there is an installer available if you wish to add an icon on the desktop, associate .blend file extensions, etc. All efforts to make Blender work on specific configurations are welcome, but we can only officially support those used by active developers.

Unfortunately, Microsoft is making it increasingly difficult for users to reject, decline or ignore the upgrade. This is simple advice full of common sense and in particular the advice that if we have 7 or 8 and are happy then no need to upgrade. I'm Leo Notenboom and I've been playing with computers since I took a required programming class in 1976.
